

Canada's Bold Step Toward Becoming An Energy Super Power: Krishnan Suthanthiran's Vision for a Sustainable Energy Future

WASHINGTON, DC, UNITED STATES, June 26, 2025 /EINPresswire.com/ -- In a pivotal moment for Canada's future, the nation is making strides to reduce its reliance on the United States for energy exports and elevate its role on the global stage. [Krishnan Suthanthiran](#), President and Founder of [TeamBest Global Companies](#) and the Global [Best Cure Foundation](#), has been waiting for this moment. With over half a century of experience in healthcare, Suthanthiran has long been committed to improving lives, and now he is bringing this same dedication to Canada's energy sector.

Since January 2013, Suthanthiran has been working on his vision for an energy pipeline corridor, energy export, and terminal to carry Canada's energy products to Kitsault, British Columbia, a private town he owns. Located just northwest of Prince Rupert, BC, Kitsault is poised to be the hub for Canada's energy future, bringing new opportunities to the region and contributing to an energy economy. With state-of-the-art housing facilities for nearly 1,000 personnel of Kitsault Energy (KE), the project promises to fuel Canada's transition to a more sustainable energy future.

Canada's political landscape is abuzz with discussions of energy infrastructure, with meetings, conferences, and think tanks exploring solutions for the country's energy future. Among these conversations, Suthanthiran and his team are actively involved, supporting initiatives such as the Indigenous Resource Opportunities Conference, the BC Natural Resources Forum, and Canada 2020.

In particular, Alberta Premier Danielle Smith has shown interest in building a pipeline from Alberta to the Port of Prince Rupert, which would enable more crude oil to be exported to Asia. Of all the proposed pipeline projects for the BC/Canada west coast, the Spectra/Enbridge pipeline from Alberta to Kitsault/Observatory Inlet stands out as the most economically viable and environmentally responsible option. With fewer disruptions to population centers, the pipeline promises to minimize environmental impact while maximizing economic potential.

KE will also use its dedicated export port and terminal at Observatory Inlet to transport energy to Asia. This critical infrastructure will open new markets, bringing billions of dollars in tax revenue to Alberta, British Columbia, and the federal government of Canada, while creating thousands of high-paying jobs. The project is expected to significantly bolster Canadian energy companies, offering new opportunities for growth and innovation, and reducing the discount and shipping costs significantly, thereby increasing revenues and profits substantially.

Economic and Social Opportunities for First Nations Communities:

The KE project isn't just about economic development—it's also about social responsibility. First Nations communities in the region will see immediate benefits, including new educational and job training centers and state-of-the-art housing facilities. Through the Best Cure Foundation Non-profit organization, KE will also provide proactive, preventive, primary medical, dental, and eye care wellness centers/services to First Nations communities. This commitment to healthcare and community empowerment is an integral part of Suthanthiran's vision for a brighter, more inclusive future for all Canadians.

With this ambitious project, Canada is positioning itself to take control of its super power vision by increasing production and diversifying its customer base to play a larger role on the world stage. As the global energy landscape shifts, Krishnan Suthanthiran's vision for Kitsault Energy is set to play a key role in shaping the future of Canada's energy sector.

About TeamBest Global Companies

TeamBest is a multinational medical company founded in 1977 in Springfield, Virginia, USA. TeamBest is driven by one primary goal—to provide the best products and services to customers. The TeamBest family of companies, collectively known as TeamBest Global, has been proudly developing, manufacturing, and delivering reliable medical equipment and supplies for www.bestcure.md more than 50 years. TeamBest includes over a dozen companies offering complementary products and services for brachytherapy, health physics, medical physics, radiation therapy, blood irradiation, vascular brachytherapy, imaging, medical particle acceleration, cyclotrons, and proton-to-carbon heavy ion therapy systems. TeamBest is the single source for an expansive line of life-saving medical equipment and supplies. Its trusted team is constantly expanding and innovating to provide the most reliable products and technologies.

Today, TeamBest employs hundreds of talented engineers, scientists and others, offering thousands of products and services. TeamBest's independently-owned companies are proud to be represented in North America, Europe, Latin America, Africa, the Middle East, and Asia. "Everyone deserves the Best healthcare. We aim Krishnan Suthanthiran, TeamBest Global to work with medical professionals to Companies/Best Cure Foundation provide the Best products, technologies and services. Our mission is to uphold our reputation for excellence in the healthcare field by developing, manufacturing and delivering cost-effective, high-quality products

to benefit patients worldwide,” states Krishnan Suthanthiran.
