

## About Krishnan Suthanthiran

**President & Founder  
Best Cure Foundation & TeamBest Companies**

Krishnan Suthanthiran is an entrepreneur engaged in multiple business ventures in Medical, Energy, Entertainment, and Real Estate and holds the role of President for multiple companies globally. Having lost his father to cancer while he was an undergraduate student, he has dedicated his career to cancer research and treatment. TeamBest products are used to treat millions of cancer patients every day globally. On April 29th 2015, in memory of his father and the millions of people affected by cancer, he launched his career-long goal of a 'Global War on Cancer' promoting Proactive Healthcare Delivery Systems worldwide.

Mr. Suthanthiran has received multiple awards and honors including: TUNE International ICON Award from Thiruvalluvar University (January 2017), "International Man of the Year 2016" award from the Multi Ethnic Advisory Task Force (MEATF) (October 2016), Power of One Award from the Patcha Foundation (October 2016), keynote speaker at the Global Health Catalyst Cancer Summit at Harvard Medical School (April 2016), and the Tamil American Pioneer (TAP) Award from the Federation of Tamil Sangams of North America (FeTNA) (July 2015).

*A healthy person has many wishes,  
but the sick person has only one.  
Health is wealth.*

– Indian Proverb –

# Best Cure Foundation's Goals

*Life is a gift from our parents. We are born to live, and live to enjoy and cherish our gift. We can look at every obstacle as an opportunity or every opportunity as an obstacle. Who we are, what we are, and where we are, have a lot to do with the choices we have made and the ones we did not. Our career and service to the community are the outcome of what we do with the gift.*

– Krishnan Suthanthiran –

- Providing purified drinking water and affordable sewer systems in every part of the world by 2030
- Establishing a global standard of healthcare delivery system using a hub-and-spoke model, with express and mobile clinics linked to general medical centers and super-specialty medical centers
- Reduce suffering/deaths from major diseases such as cardiac, cancer, diabetes, and others by 50% by the end of the next decade

### **3E – Education, Empowerment and Equality**

Krishnan Suthanthiran has established a division under BCF called "3E – Education, Empowerment and Equality" to promote the development and advancement of women. It is his belief that every man and woman was given birth to, nursed, nourished, and raised by women, and therefore, they share a greater responsibility in juggling career and family, in raising children and caring for the home.

# ABOUT KRISHNAN SUTHANTHIRAN

Founder and President of TeamBest Companies, Best Cure Foundation, and Kitsault Energy

Krishnan Suthanthiran traveled to Canada from India in September 1969 after graduating with a Bachelor's Degree in Mechanical Engineering from University of Madras, India, to pursue his Master's Degree in Mechanical Engineering at Carleton University in Ottawa, Ontario. He arrived with a total of 400 Canadian Dollars. Subsequently, he received a National Research Council of Canada Research Assistantship which helped him to meet his financial needs. All of his college education was financed using his merit scholarship and Research Assistantship. He graduated with a Master's Degree in Mechanical Engineering in 1971 from Carleton University. He moved to the United States in 1972 and worked as an Engineer Physicist at Howard University Hospital in Washington, DC, USA until 1978.

He has founded and invested hundreds of millions of US dollars globally during the past 40 years, in medical products manufacturing, healthcare delivery, real estate, entertainment, and energy companies. His family of medical companies is known collectively as TeamBest. He founded and supports a few non-profit charitable organizations to make quality education and healthcare affordable and accessible globally. He has contributed substantially to setting up endowed chair and endowments for scholarships at various universities. He has provided significant funding to support medical research and treatment by partnering with academic institutions, national labs, and hospitals around the world.

Having lost his father to cancer while he was an undergraduate student in engineering, he has dedicated his career to cancer research and treatment. TeamBest products are used to treat millions of cancer patients globally. On April 29th 2015, in memory of his father and the millions of people affected by cancer, he launched his career-long goal of a 'Global War on Cancer' (see press release: <https://www.prbuzz.com/health-a-fitness/310650-global-war-on-cancer-launched-by-best-cure-foundation-and-teambest-companies.html>) promoting Proactive Healthcare Delivery Systems worldwide, which are focused on transparency of clinical benefits, outcome, and cost. Using a Total Health Approach through prevention, early detection, and effective treatment, improvement of clinical outcomes are possible at a significantly lower cost. TeamBest and Best Cure Foundation (BCF) are planning to create a global standard of healthcare delivery system using a hub-and-spoke model, with express and mobile clinics linked to general medical centers and super specialty medical centers. Best Cure Foundation is also working towards providing purified drinking water and affordable sewer systems in every part of the world, by the end of the next decade.

He has established a division under BCF called "3E – Education, Empowerment and Equality" to promote the development and advancement of women. It is his belief that every man and woman was given birth to, nursed, and nourished by women, and therefore, they share a greater responsibility in juggling career and family, in raising children and caring for the home. In memory of his mother, Krish is proud to support women around the world in pursuing their goals through the 3E organization.

He is planning to establish a multi-phased energy project in the town of Kitsault, British Columbia, Canada, which he owns in its entirety, under Kitsault Energy. This project is estimated to cost \$30 to 40 Billion over 7–10 years for establishing a dedicated energy corridor from northeast British Columbia and northwest Alberta to Kitsault; an export terminal and port for shipping energy products to Asia and Latin America. Currently, Kitsault Energy is working with multiple partners who have expressed desire to invest in this project and to be part of a group of customers for the energy products.

# TeamBest Companies enters agreement to acquire ABT Molecular Imaging, Inc. and announces creation of Best ABT, Inc.

**PRESS RELEASE • November 12, 2018**

**Washington, DC & Knoxville, TN USA • Vancouver, BC Canada**

Best Medical International, Inc. (BMI) and Best Cyclotron Systems (BCS) both part of the TeamBest group of companies, are pleased to announce the creation of Best ABT, Inc. Best ABT, Inc. has entered into an agreement to acquire ABT Molecular Imaging, Inc. (ABT), a Knoxville, TN based cyclotron manufacturing company.

The TeamBest group of companies, founded by Krishnan Suthanthiran, is headquartered in Springfield, Virginia, USA, and manufactures a variety of quality products for the radiation therapy and diagnostic community. BCS currently offers a wide array of cyclotrons ranging from 15 MeV to 70 MeV. A fully-functioning Best 70 MeV cyclotron has been successfully installed in Legnaro, Italy. BCS is currently installing several other cyclotrons in various countries worldwide.

Best ABT, Inc. will be a valuable addition to the TeamBest cyclotron portfolio that will allow TeamBest to deliver quality oncology diagnosis and care to a large group of currently underserved patients worldwide. The acquisition of ABT will bring a wealth of experience in smaller cyclotron technology, as well as in automated chemistry to TeamBest. The cyclotron manufactured by ABT, the BG-75 Biomarker Generator (BG-75 System) is smaller and easier to install and operate than most conventional systems. The BG-75 integrates a compact cyclotron with micro-chemistry and automated quality control system, to provide on-demand F-18 FDG production in one seamless solution (“Dose-On-Demand”) to support the diagnostic community. With more than 25 BG-75 Systems sold worldwide, Best ABT, Inc. will allow the TeamBest group of companies to expand its global reach into more diverse markets than ever before.

With this acquisition, TeamBest is taking another step in delivering on its promise to deliver “healthcare for everyone”. Together with Best Cure Foundation (BCF), the TeamBest group of companies will set up a hub-and-spoke model healthcare delivery system, linked to General, as well as Super-Specialty Medical Centers, availing themselves of all of TeamBest’s new and advanced technologies worldwide.

For more information, please visit [www.teambest.com](http://www.teambest.com) or visit our booth #4124 at RSNA in Chicago, Illinois November 25–28, 2018.

# Best Particle Therapy, Inc. is Developing a Highly Revolutionary New Treatment for Cancer Therapy

The most precise and conformal Cancer Therapy, using hypo-fractionation, supported by a range of the most advanced cyclotrons for research and radioisotope production for medical diagnosis and therapy in the world

**PRESS RELEASE • 6:00 AM EST • MAY 24, 2018**  
**Cincinnati, Ohio & Washington, DC, USA**

Best Theratronics Ltd. (BTL), Best Cyclotron Systems (BCS), Best Particle Therapy (BPT), and Best Medical International (BMI) – all part of TeamBest Medical Companies – are the only companies offering a range of new medical cyclotrons and synchrotrons. These use the most advanced new technologies to offer revolutionary diagnosis and treatment capabilities.

In the next couple of years, Best Particle Therapy will introduce their unique 400 MeV ion Rapid Cycling Medical Synchrotron (iRCMS) with Variable Energy, Heavy Ion Treatment Technologies, offering Proton-to-Carbon Heavy Ion, for Highly Precise, Conformal and Hypo-Fractionated Radiation Therapy. This will be the most advanced new technology for Cancer Therapy, enhancing the cure for many millions of Cancer patients, who do not have this option currently.

The advantages of the Best 400 MeV iRCMS are:

- Intrinsically small beams – facilitating beam delivery with precision for the most conformal radiation therapy
- Hypo-fractionated radiation therapy
- Small beam sizes – small magnets, light gantries – smaller footprint
- Highly efficient single turn extraction – less shielding
- Flexibility – heavy ion beam therapy (protons and/or carbon), beam delivery modalities

In addition to the iRCMS, BCS currently offers a range of New Advanced Technology Cyclotrons, ranging from 15 MeV to 70 MeV – with as high as 1000 micro Amp current for each cyclotron. With the development of a Multi-Particle (Alpha, Deuteron and Proton) 35 MeV Cyclotron, BCS can support the needs of all new therapy capabilities as well.

In partnership with Best Cure Foundation (BCF), TeamBest Companies will set up a Hub-and-Spoke Model of Healthcare Delivery System, using Express and Mobile Clinics, linked to General and Super-Specialty Medical Centers, using all of TeamBest's new and advanced technologies globally.

For more info, please visit: [www.teambest.com](http://www.teambest.com) and [www.teambest.com/about bio.html](http://www.teambest.com/about_bio.html).

# Best Global Healthcare Uberization

Best Cure Foundation and TeamBest Companies launched the “Best Global Healthcare Uberization“ in 2018.

Some of the TeamBest Companies have been in existence nearly 100 years, and have been pioneers in the development of many technologies, products and treatment planning softwares, etc. used in Radiation Therapy for malignant and non-malignant diseases.

Best Cure Foundation, a global nonprofit NGO founded in 2007, has been promoting a Total Health™ approach – consisting of Prevention, Early Detection and Effective Treatment for Total Cure – by practicing ProActive Healthcare Delivery with Full Transparency on Clinical Outcome, Benefits and Cost. These goals can be accomplished by establishing a Hub-and-Spoke Model Healthcare Delivery System, with Express & Mobile Clinics linked to General and Super/Multi-Specialty Medical Centers, connected to 1, 2, 3, 4, and 5 Star Apartment Hotels around the world.

Globally, Cardiac Diseases lead as the number one cause of death, with Cancer as the second, and Medical Misadministration/Negligence/Infection acquired at Hospitals/Clinics as the third largest killer.

Our Best Global Healthcare Uberization will focus on Clinical-Outcome-based Reimbursement, with all modern technologies and alternative medicine practices under one roof. These include Best Cure Health System and Best Cure Insurance (both nonprofit NGOs), Best Medical Real Estate Investment Trust (for building infrastructure), Best Medical Capital (for all technologies financing/leasing/service/maintenance), and TeamBest Companies for manufacturing all the products/devices/technologies.

Currently, similar systems do exist – such as Kaiser Permanente/Foundation which has non-profit Healthcare Delivery and Health Insurance in the USA. In addition, there are Group Purchasing Organizations (GPOs) that achieve some of these goals. However, we need a more elaborate network that will include manufacturing and financing/leasing/service/maintenance, encompassing all technologies (low, medium, high and highest), including Alternative Medicine to create a Global Standard of Healthcare Delivery.

Worldwide, we spend 10 Trillion USD a year for Healthcare Delivery, and it is growing by 10% per year as the single largest economy in the world.

Please join Best Cure Foundation and TeamBest Companies in our global efforts to reduce death and suffering from Cancer, Cardiac, Diabetes and all major diseases, by 50% or more by the end of next decade 2030.

For more information, please visit [http://www.teambest.com/about\\_bio.html](http://www.teambest.com/about_bio.html).

# Best Cure Foundation (BCF) & TeamBest Companies are launching non-profit/non-governmental Best Cure Health System & Best Cure Insurance globally to make the 10+ trillion USD global healthcare delivery system significantly better and less expensive

**PRESS RELEASE • FEBRUARY 19, 2018**

**Washington, DC, USA • Ottawa, ON, CANADA • Chennai/Mumbai/New Delhi, INDIA**

In 2007, Krishnan Suthanthiran established Best Cure Foundation (a non-profit non-governmental organization) to make quality healthcare and higher education affordable and accessible to everyone globally.

Mr. Suthanthiran believes, "Health is wealth – A healthy person has many wishes, but a sick person has only one. Everyone deserves the best healthcare. In addition, higher education is the most effective way to eliminate poverty and promote global understanding and peace."

Best Cure Foundation's main goal is to reduce the deaths and suffering from Cancer, Cardiac, Diabetes and other major diseases by 50% by the end of the next decade.

Over the last 11 years, Mr. Suthanthiran has been promoting Best Cure Foundation at his own expense and contributions – and now, Amazon, Berkshire Hathaway and JPMorgan Chase & Co. have joined together to establish a form of non-profit healthcare program (contemplated by BCF 11 years ago) for nearly one million of their employees. There are other groups around the world trying to implement the recommendations of BCF over the last ten years.

Mr. Suthanthiran is launching his Global Healthcare Plan, by establishing a Hub-and-Spoke Model healthcare delivery system of Express and Mobile Clinics linked to General and Super-Specialty Medical Centers. These are part of his efforts to set right the vast 10+ trillion USD global healthcare economy, which is growing at 10% or more every year, using his non-profit foundations – Best Real Estate Investment Trust, Best Medical Capital and his family of private medical companies, collectively known as TeamBest. TeamBest Companies are innovators and pioneers of many of the advanced medical technologies used globally today.

Mr. Suthanthiran has stated, "BCF will be using a Total Health approach of Prevention, Early Detection and Effective Treatment for Total Cure, using many new innovative technologies and practices, including a Proactive Healthcare Delivery System, with full transparency on clinical outcomes, benefits and costs."

# Best Cure Health System (BCHS), in partnership with Best Cure Foundation (BCF), TeamBest Companies, and Best Cure Insurance (BCI) is launching a new revolutionary, non-profit healthcare delivery program

**PRESS RELEASE • FEBRUARY 19, 2018**

**Washington, DC, USA • Ottawa, ON, CANADA • Chennai/Mumbai/New Delhi, INDIA**

BCHS will establish a global network of 500 plus Cyclotrons (15 MeV to 70 MeV) and Radiopharmaceutical Clinics with full-fledged Diagnostic Radiology Centers as part of BCHS Delivery Network.

These Medical and Diagnostic Centers will operate 24/7, and offer care at lower than normal charges, including significantly reduced co-pays for patients, in conjunction with BCHS Express and Mobile Clinics, General and Super-Specialty Medical Centers.

All of the technologies, devices and products associated with the delivery of these BCHS Medical Services will be manufactured, distributed, installed, commissioned and serviced by TeamBest Companies.

# Best Cyclotrons Systems, Inc. & Best Theratronics Ltd. Announce Advanced State-of-the-Art Cyclotrons Designed and Manufactured in Canada

**PRESS RELEASE • Ottawa, Ontario, CANADA & Vancouver, British Columbia, CANADA  
FEBRUARY 13, 2018**

Best Cyclotron Systems, Inc. (BCSI) and Best Theratronics Limited (BTL), both members of TeamBest Companies, announce a range of cyclotrons with highly advanced, state-of-the-art technologies, for Research, Diagnostic and Therapy Isotope Production.

The Best 15, 20, 25, 30, 35 and 70 MeV Proton Cyclotrons are designed for single particle, but with multiple beam lines. In addition, a new advanced design Best 35 MeV Multi-particle and Multi-beam Cyclotron (to produce Alpha, Deuterons and Protons) is currently under development to meet customers' needs.

All of the Best Cyclotrons can be designed to operate at 1000 Micro Amp Current or higher for Proton Beams and will have the capability to be a potential Neutron source for the production of select medical radioisotopes for research, diagnostic and therapy applications.

Two years ago in Italy, TeamBest installed the only 70 MeV Cyclotron produced by a commercial enterprise, operating as specified, at full power, and capable of operating higher than 700 Micro Amp, for Proton Beams as high as 70 MeV.

Over the last several years, BCSI and BTL have become the most capable Multi-Particle, Multi-Beam and Multi-Energy Cyclotrons in the world.

AN INTERNATIONAL ONLINE JOURNAL

## Advances in Nuclear Medicine & Molecular Imaging

**Advances in Nuclear Medicine & Molecular Imaging (ANMMI)** will be a quarterly online journal, free of subscription fees to all medical professionals and libraries around the world!

***Starting in June 2019 or later***

The *ANMMI International Online Journal* is being created by Krishnan Suthanthiran, President & Founder of TeamBest Companies including Best Cyclotron Systems, Inc., along with several medical professionals across the globe, to form a board of editors for this peer-reviewed journal.

Each quarter, the *ANMMI International Online Journal* will be distributed to subscribers via email. Two weeks after each release to subscribers, content will be made available to read online at [www.anmjnl.org](http://www.anmjnl.org).

For more information, please contact: [info@anmjnl.org](mailto:info@anmjnl.org) [www.anmjnl.org](http://www.anmjnl.org)

The *ANMMI International Online Journal* is funded in part by the following:

# Kitsault Energy (KE) Announces Plan to Turn Waste into Energy in India and Canada

**PRESS RELEASE • Vancouver, BC & Ottawa, ON, CANADA • Mumbai & New Delhi, INDIA  
FEBRUARY 19, 2018**

Kitsault Energy (KE) is pleased to announce plans to turn waste into energy in India and Canada using a Proprietary and Patented process. The waste includes legacy waste wood from pulp and paper plants, municipal solid waste, road waste, food waste, animal manure, and invasive species such as Gando Baval in India. The process produces high-energy water-repellent solid biofuel that burns with no residual ash making it ideal for coal replacement in the steel and cement industries, who together are responsible for 10% of fossil-fuel greenhouse gas emissions worldwide. KE's process is a green solution to landfills and holding ponds that transforms the energy of decaying bio-waste into a viable coal alternative, which offsets fossil carbon dioxide, reduces methane off-gassing, and eliminates prions when used to treat animal manure. The process works especially well with high-moisture bio-waste, avoiding costly pre-drying.

Krishnan Suthanthiran, President & Founder of KE says, "Kitsault Energy invites municipalities, companies, and governments with a green vision of the future to join us. Climate change, the expected cost of carbon in tomorrow's economy, the desire to get off fossil fuels, the need to develop alternative energy sources, the ever-growing problem of landfills, and the drive for a sustainable future are all compelling reasons to join us. We offer a small step in the right direction."

Kitsault Energy was founded to develop the energy riches of the Pacific Northwest of Canada by Krishnan Suthanthiran, who also is the President and Founder of the TeamBest Companies devoted to providing affordable healthcare. Reducing pollution and developing green energy sources is part of KE's prescription for a healthy planet.

For more information about Kitsault Energy, please visit [www.kitsaultenergy.com/press](http://www.kitsaultenergy.com/press). To read Krishnan Suthanthiran's bio, please visit [www.teambest.com/about bio.html](http://www.teambest.com/about_bio.html)

# Kitsault Energy is Working to Solve the Energy Challenges of both India and Canada, including the Pollution Problems of India

**PRESS RELEASE • Vancouver, BC & Ottawa, ON, CANADA • Mumbai & New Delhi, INDIA  
FEBRUARY 14, 2018**

India and Canada need each other, yet what took so long for its two Leaders to meet after being elected in 2014 and 2015?

The Prime Minister of Canada, Hon. Justin Trudeau will meet his counterpart, Indian Prime Minister Hon. Narinder Modi, over four days with a group of Canadian and Indian business leaders on February 20–23, 2018 in Mumbai and New Delhi, India.

Canada is landlocked and unable to ship and sell its energy products to any country except USA. In fact, Canada has been the second largest importer of US crude oil during the past 9 months. USA is producing as much crude oil as Saudi Arabia (10.3 million plus barrels of crude oil per day, currently) and exporting LNG, LPG, crude oil and refined petroleum products (such as diesel and gasoline) globally, including Asia.

In the meantime, most of the Canadian projects, though they have questionable economics of financial returns, have been shelved – for LNG productions, Crude Oil and Natural Gas Pipelines – thereby, no export to Asia and other countries, except the projects promoted by Kitsault Energy ([www.kitsaultenergy.com](http://www.kitsaultenergy.com)).

India imports 90% of its crude oil and the majority of its natural gas, LPG and LNG annually.

Kitsault Energy is working to solve the challenges of both India and Canada by exporting a range of Canadian Energy Products (in fact, all of Canada's available for export) from a dedicated Energy Corridor, Port and Terminal from Kitsault, BC – as this is the least expensive, most environmentally sound, and with the least number of First Nations along the Pipeline Route. (KE is working with the First Nations to build their local economy, help with housing, healthcare, education, training and job creation.)

Both TransCanada and Enbridge/Spectra have secured many of the necessary approvals for a dedicated Energy Corridor of multiple pipelines from the energy-rich NE BC and NW Alberta, to or via Kitsault, to the Tidewater on the NW BC.

KE has many interested parties for Canada's energy products and investments in pipeline and other infrastructures, including production plants for methanol and LNG.

Mr. Suthanthiran has travelled to Asia several times over the past few years and is "...excited to present this solution to the Prime Ministers of Canada and India to solve both countries' energy challenges and the huge pollution problems in India."

For more information about Kitsault Energy, please visit [www.kitsaultenergy.com/press](http://www.kitsaultenergy.com/press). To read Krish Suthanthiran's bio, please visit [www.teambest.com/about/bio.html](http://www.teambest.com/about/bio.html)

# Krish Suthanthiran, President of Kitsault Energy, Proposes a Smarter and Significantly Less Expensive, Environmentally Sensible and Quicker Solution to Address the Canadian Energy Crisis

**PRESS RELEASE • October 12, 2016 • Vancouver, BC, Canada and Calgary, AB, Canada**

Krish Suthanthiran, President of Kitsault Energy, will be speaking at the BC Natural Gas Symposium taking place at the Four Seasons Hotel, Vancouver on October 25th, 2016. Mr. Suthanthiran's speech titled "Update on Kitsault Energy and the Hypocrisy of Energy Policies", will highlight a smarter, significantly less expensive, environmentally sensible, and quicker solution to address the Canadian energy crisis.

**Where we are today** – Canadian and International Energy Companies have spent nearly 15 Billion USD over the last ten years to build multiple pipelines, estimated to cost nearly 100 Billion USD, yet none has been built so far, either for natural gas or crude oil.

**Here are the rough estimates for the various energy pipeline projects:**

- Kinder Morgan Trans Mountain Pipeline to add another 400,000 Barrels of Crude Oil per day, (doubling the capacity) – 8 to 10 Billion USD.
- Enbridge Northern Gateway project to Kitimat – 6 to 8 Billion USD.
- TransCanada, XL Keystone – 15 Billion USD.
- TransCanada, Canada East – 15 to 20 Billion USD.
- Petronas/TransCanada Natural Gas Pipeline to Lelu Island – 6 to 8 Billion USD.
- BG Group/Spectra Natural Gas Pipeline to Ridley Island – 5 to 7 Billion USD.
- Shell Kitimat project Natural Gas Pipeline – 4 to 5 Billion USD.
- Chevron/Woodside Kitimat Project Pipeline – 4 to 5 Billion USD.

**The market for LNG and crude oil** – In the near future, the USA will not need Canadian natural gas or crude oil, as they are producing a large quantity domestically and get less expensive imports from countries like Mexico, Nigeria, Venezuela, and Saudi Arabia. However, Japan, Korea, China, India, and other Asian countries do need significant quantities of energy products, both crude oil and natural gas.

Kitsault, BC, Canada, north of Prince Rupert, is the closest to Asia – about one week of travel time – with no canal or other tolls along the way, nor delays due to port traffic congestion. Kitsault is the shortest distance from Northeast BC and Northwest Alberta for all energy products, with the pipeline estimated to be only 700 kilometers long. The Alice Arm waterway (where Kitsault is located) is wide, deep, and ice-free, and ships will need to travel only 50 to 60 kilometers before entering international waters. This is a significant advantage over Prince Rupert and Kitimat Douglas Channel waterways which has expanding container, coal, passenger, and ferry traffic.

By establishing a Dedicated Energy Corridor (DEC) and Dedicated Export Terminal (DET) with multiple pipelines carrying a range of energy products, Kitsault Energy Port and Terminal will be environmentally sensible, smarter, and significantly less expensive than building 10,000 to 15,000 kilometers of pipeline all over Canada and USA at a cost of nearly 100 Billion USD. Pipelines carrying energy products to Kitsault Port and Terminal will cost approximately 20 to 25 Billion USD. Infrastructure such as housing for nearly 1,000 residents, BC hydro electricity grid, community center, library, recreation centers, and restaurants already exist at the town of Kitsault, further reducing the potential environmental footprint. In addition, the DEC to Kitsault can be monitored continuously by a team of drones, to ensure all systems are functioning properly.

Mr. Suthanthiran will also be participating at the Energy Roundtable on October 12th at the Hyatt Regency in Calgary, Alberta.

# Krishnan Suthanthiran, Founder & President of TeamBest Companies and Best Cure Foundation, will be the keynote speaker at the Global Health Catalyst Cancer Summit at the Harvard Medical School, April 29-30, 2016, Boston, MA, USA

**PRESS RELEASE • WASHINGTON, DC, USA • APRIL 20, 2016**

On April 29–30, 2016, Krishnan Suthanthiran, President of TeamBest Group of Companies and Founder of Best Cure Foundation, will be the keynote speaker at the Global Health Catalyst Cancer Summit at the Harvard Medical School in Boston, MA, USA. In addition to Mr. Suthanthiran's keynote speech, the meeting will also feature speakers from Harvard Medical School, presidents of medical companies and global non-profit organizations, professors of area universities, and other strategic partners, in the fight against Cancer worldwide and the elimination of global health disparities.

This summit coincides with the first anniversary of the Global War on Cancer initiative launched by Mr. Suthanthiran on April 29, 2015. With his plan, he seeks to establish a Hub-and-Spoke model of healthcare delivery systems to overcome shortcomings and make quality healthcare affordable and accessible worldwide. It is Mr. Suthanthiran's belief that, "Everyone deserves the best healthcare, regardless of ethnicity, gender, economic status, or geographical location."

In 1965, Krishnan Suthanthiran's father was diagnosed with colon cancer while Krishnan was an undergraduate engineering student in India. For more than three years, he watched painfully as the cancer spread throughout his father's body, reducing a strong and robust man to a mere shadow of his former self. His father finally passed away in 1968, after a long and painful struggle. Witnessing the suffering he endured from cancer was the turning point that led Mr. Suthanthiran to dedicate his career to the prevention and possible cure for all types of cancer. Mr. Suthanthiran has spent more than 40 years in cancer research, treatment, and cure. He has established and acquired a number of medical companies globally, in order to collect many of the technologies needed to establish a Proactive Healthcare Delivery System. The system is focused on transparency of clinical outcome, benefits and cost using a Total Health Approach – Prevention, Early Detection, and Effective Treatment for Total Cure.

Mr. Suthanthiran states that, "It is an honour to have been chosen to give the keynote address at the Global Health Catalyst Cancer Summit, and I hope that everyone will join my efforts in the Global War on Cancer."

# An Open Letter to the Right Honourable Prime Minister Justin Trudeau, wife Sophie Grégoire-Trudeau, and Canadian Members of Parliament

**From: Krishnan Suthanthiran, Founder & President, Best Cure Foundation and TeamBest Companies**  
**November 11, 2015**

**Subject: The Dawn of a Truly Transformational World Leader from Canada**

Today is Remembrance Day in Canada and Veterans Day in USA in honour of fallen and wounded soldiers. All of us sincerely appreciate their sacrifices and we want to wish their families the very best on this day of remembrance.

Last week on November 4th, 2015, the Right Honourable Justin Trudeau, Member of Parliament and the Leader of the Liberal Party, was sworn in as the new Prime Minister of Canada. He was joined by his mother Margaret Trudeau, wife Sophie Grégoire-Trudeau, his two sons, and daughter. It was an awe-inspiring event in the history of Canada and mankind to see the son of former Prime Minister, the late Right Honourable Pierre Elliott Trudeau, take the oath of office as Prime Minister of Canada in the dawn of a new era for Canada and the world.

I believe Mr. Trudeau will truly be a transformational world leader and he is already rated as one of the world's most influential leaders. He has kept his promise (unlike many elected officials and leaders) of creating a diverse 30 member cabinet with 15 women and 15 men of distinction and seeking ethnic diversity with a First Nations female attorney as the Justice Minister of Canada, four Indo-Canadians for Defense, Economic Development, Innovation and Science, Small business and Tourism, and lastly for Infrastructure Development of Canada. This is the first time in the history of any free and democratic government, in any part of the world, that a transformational selection of Cabinet Ministers or Secretaries has been made by a leader. What a positive change and what a great day to celebrate gender parity and ethnic diversity! We should choose November 4th of every year as the day to celebrate gender parity and ethnic diversity.

I would like to invite all of you, as influential members of this new government, to join my initiatives to reshape the future of healthcare and education in Canada and around the world:

1. **Best Cure Foundation**, our non profit organization, in promoting our division **3E** (Triple E) **Education, Empowerment and Equality** to promote everyone regardless of Ethnicity and Gender, by treating all as equals. Education is the most effective way to eliminate poverty and promote global understanding and peace.
2. The **Global War on Cancer**, which strives to establish a Hub-and-Spoke model of healthcare delivery systems to overcome shortcomings and make quality healthcare affordable and accessible. Everyone deserves the best healthcare. I am honoured to state that I have been invited by Harvard Medical School in Boston, MA, USA to be the keynote speaker at their Global Health Catalyst Cancer Summit, April 29–30, 2016, which is the first anniversary of my initiative of launching a Global War on Cancer, started on April 29, 2015.

# Global War on Cancer — Launched by Best Cure Foundation and TeamBest Companies

In 1965, Krishnan Suthanthiran's father was diagnosed with colon cancer while Krishnan was an undergraduate engineering student in India. For more than three years, he watched painfully as the cancer spread throughout his father's body, reducing a strong and robust man to a mere shadow of his former self. His father finally passed away in 1968, after a long and painful struggle. Witnessing the suffering he endured from cancer was the turning point that led Mr. Suthanthiran to dedicate his career to the prevention and possible cure for all types of cancer.

After graduating with a Bachelor's (India) and Master's (Canada) Degree in Mechanical Engineering, he was fortunate to be recruited in 1972 by a world-renowned oncologist in Washington, D.C., to develop devices and instrumentation for research and treatment of cancer patients.

Since then, Mr. Suthanthiran has spent more than 40 years in cancer research, treatment, and cure. He has established and acquired a number of medical companies globally, in order to collect many of the technologies needed to establish a Proactive Healthcare Delivery System, focused on transparency of clinical benefits, outcome, and cost using a Total Health Approach – Prevention, Early Detection, and Effective Treatment for Total Cure. TeamBest's products have been in use in nearly 100 countries for over 60 years for cancer treatment, and TeamBest companies continue to work with various regions throughout the world to set up comprehensive cancer management solutions. Mr. Suthanthiran states that "This has been a journey of more than half a century, and with these efforts, I am proud to say that we are ready to launch a '**Global War on Cancer**'."

While there have been many significant improvements and advancements in medical technologies, many patients around the world do not receive timely interventions or the right care. Mr. Suthanthiran firmly believes more should be done. In 2007, he formed the Best Cure Foundation to work with TeamBest companies, and other leading-edge companies and experts, to establish a Hub-and-Spoke model of healthcare delivery systems to overcome these shortcomings. Best Cure Foundation's goal is to launch a Global War on Cancer that includes express and mobile clinics linked to general and super-specialty medical centers worldwide.

Mr. Suthanthiran has interacted with those in the private sector and government agencies, in more than 20 countries over the last 18 months, in Asia, South America, the Middle East, and North America. In that time, he has stated, "It is clear that there is a groundswell of support for a better, affordable, and accessible healthcare delivery system globally."

The Best Cure Foundation invites everyone to support its efforts in launching this Global War on Cancer. For more information, please visit [www.bestcure.md](http://www.bestcure.md) and [www.teambest.com](http://www.teambest.com), or contact [info@bestcure.md](mailto:info@bestcure.md).

# An Open Letter to President Barack Obama and the Institute of Medicine (IOM)

**From Krishnan Suthanthiran, Founder and President of Best Medical International and Best Cure Foundation**

**PRESS RELEASE • Springfield, VA 22153 USA • October 22, 2012**

Recently, I read the report from the Institute of Medicine (IOM) titled “Best Care at Lower Cost: The Path to Continuously Learning Health Care in America”, dated September 2012. In my letters to President Barack Obama and World Leaders in June 2010, I mentioned reducing our healthcare costs by 30% of our then 2.5 TRILLION USD (annually). This amounts to 750 BILLION USD of savings for the year 2009. This is exactly the amount mentioned for 2009 in the IOM report dated September 2012, that we could have saved if we have a system similar to what I have proposed. Very interesting. Please take a moment to read my letters to President Barack Obama and World Leaders dated June 2010 and compare them with the IOM report of September 2012.

I founded Best Medical International in 1977 to be the Best in the world. Having lost my father to Cancer, I have dedicated my career of 40 years to the prevention, early detection, effective treatment and total cure for Cancer, by developing and manufacturing highly innovative products and technologies. Being a leader and innovator, TeamBest® is currently bidding on multiple projects worth nearly One Billion USD worldwide. Best’s family of companies, collectively known as TeamBest® is planning an additional 600,000 square feet facility for R & D, manufacturing, sales, marketing, exporting, and to hire nearly 1,000 high tech employees over the next 5 years or sooner. TeamBest®’s products are used by nearly 10,000 Hospitals worldwide at one time or another.

My commitment, dedication and passion for improving, and reducing the cost of education and healthcare, led to the birth of Best Cure Foundation in 2007. Best Cure is a nonprofit NGO (non-governmental organization), committed to making quality education and health care affordable and accessible globally by lowering the cost as much as 30% by innovative and highly efficient PROACTIVE HEALTHCARE™ using the TOTAL HEALTH SYSTEM™ and Digital Technologies. Believing in this, I have personally provided multi-million dollars in donations and loans to Best Cure, to establish Express and Mobile Clinics, Medical Centers, and Super Specialty Medical Centers with Digital Technologies, in the USA and globally. Early this year, I purchased a hospital in Brownsville, PA.

The above summary is to give you an idea of our companies, foundation and their activities. To learn more about us you may like to visit the following websites: [www.teambest.com](http://www.teambest.com), [www.bestcure.md](http://www.bestcure.md), [www.kitsault.com](http://www.kitsault.com).

healthcare for everyone

**cure**  
FOUNDATION

## Subject: **Improving U.S. Healthcare Delivery at a Lower Cost for a More Secure Future**

Dear Mr. President,

This is the first in a series of my communications with you and our fellow Americans to engage in an objective discussion about the future of our country.

During the healthcare reform debate, you stated: “In the end, that’s what this debate is about – it’s about the kind of country we want to be.” I agree that we are at a critical point in our history. What we do to overcome America’s current challenges will define our future. **In 2020, will America be a country of dreams or ghost towns?**

I am proud to be an American. As an entrepreneur and small business owner with four decades of healthcare experience, I would like to share my vision for our country and the future of our healthcare system.

The Patient Protection and Affordable Care Act is a historic landmark for U.S. healthcare, bringing a century of disappointment to an end. Providing funds for comparative effectiveness studies is one of the cornerstones of the bill. However, there remains widespread concern that implementing this bill will increase costs to the federal and state governments, thereby increasing the deficit. Small businesses are unsure of the cost of premiums and other long-term effects of the bill. We all must work together to address these issues and develop a comprehensive healthcare solution every American can support.

Mahatma Gandhi dreamed of a free India. Today, it is the world’s largest democracy. President John F. Kennedy dreamed of landing a man on the moon; eight years later we took that “giant step for mankind.” Reverend Martin Luther King dreamed people would one day be judged by their character rather than their color. He helped pave the way for you to be elected President of the United States.

**I, too, have a dream – one shared by millions of our fellow Americans – and a plan to realize this dream of quality healthcare that is affordable and accessible to all, yet 30 percent lower in cost this decade. After all, everyone deserves the best healthcare.**

**I, too, have a dream – one shared by millions of our fellow Americans – and a plan to realize this dream of quality healthcare that is affordable and accessible to all, yet 30 percent lower in cost this decade. After all, everyone deserves the best healthcare.**

**“A healthy person has many wishes, but the sick person has only one.” – Indian Proverb**

**Such initiatives could save as much as \$500 billion from the current annual healthcare expenditures in the U.S. of \$2.5 trillion.**

My plan can save millions of lives and alleviate the suffering caused by preventable diseases. These efforts will help eliminate needless and expensive emergency room visits, hospitalization and intensive care stays. In the process, our country can save as much as \$500 billion from our current annual healthcare expenditures, now estimated to be \$2.5 trillion and growing. I recognize this is a monumental task; but we can succeed, and I believe we will.

When I graduated from high school in India, a friend's father asked me if I was going to college like his son. Before I could answer, he replied sarcastically that I couldn't go because my father was poor. Yet I graduated with bachelor's and master's degrees in engineering and am helping many achieve the same dream.

As a young engineering student, I saw my father suffer and die from cancer and decided then I wanted to work in oncology. After graduation I was fortunate to begin my career with an oncologist in Washington, DC in 1972. Five years later I opened Best Medical International and have operated the TeamBest family of companies ever since.

I named my company Best to reflect my goal of being the best. I am proud to say that we have developed a reputation for being the best and the most experienced in the business. Our products have saved millions of lives worldwide and continue to do so every day.

**After four decades in healthcare, I have seen the good, the bad, and the ugly sides of medicine and health insurance. I founded CURE Foundation in 2007 to create a new paradigm and promote my plan for improving healthcare globally. Among our goals and accomplishments:**

■ CURE Foundation plans to establish world-class express/mobile clinics and medical centers globally. Supported by CURE Global Purchasing Organization, utilizing CURE Global Insurance, they will be truly non-profit, non-governmental, private, self-sustaining organizations.

■ CURE Foundation will open the first of one thousand such centers in Montgomery County, Maryland by the end of this year. The center will focus on establishing a global standard of care. These centers will care for patients on an individual basis, providing the best care for their specific needs.

■ CURE centers will recruit only skilled medical professionals with integrity. Free continuing medical education and training will be offered. **Bonuses and incentives will be paid based on clinical outcome and patient satisfaction.** Hours of operation will reflect the needs of a community for each specific center. Some centers will operate for 16 hours or more per day, possibly six or seven days a week.

■ CURE centers' commitment to Proactive Healthcare™ with full transparency of benefits, clinical outcome, and cost, and the Total Health™ system of prevention, early detection, and effective treatment will open doors to a new era of affordable and accessible healthcare.

■ **Such initiatives could save as much as \$500 billion from the current annual healthcare expenditures in the U.S. of \$2.5 trillion.**

■ CURE Foundation has been working with medical centers, colleges of medicine, private and public hospitals and other organizations, providing funding to develop cost-effective technologies. We are currently working with ambassadors, health ministers, presidents and prime ministers of many countries to develop a ten-year plan to upgrade healthcare programs.

As an Independent, I have voted for candidates from both parties. I am President and sole shareholder of my companies and have no aspirations for political appointment or elected office. I am passionate about my career and believe in what I do. What excites me about my work is my ability and desire to help save lives. Often I am asked about my plans for retirement, but as long as lives are saved, I will pursue my passion and contribute to society.

Mr. President, I would like to invite you, First Lady Michelle Obama, and all our fellow Americans to join CURE Foundation's initiatives to reshape America's future for this decade and beyond. I would be honored to receive your comments/support for CURE Foundation. For more information, please visit [www.cure.lu](http://www.cure.lu); send comments to [krish@cure.lu](mailto:krish@cure.lu).

Sincerely yours,

*Krishnan Suthanthiran*

Subject: **CURE Global 2020 — Improving Healthcare Delivery at a Lower Cost**

June 2010

Dear Ladies and Gentlemen,

This is the first in a series of my communications with you and our fellow citizens of the world to engage in an objective discussion about improving healthcare delivery at a lower cost. As an entrepreneur and small business owner with four decades of healthcare experience, I would like to share my vision for the future of the global healthcare system.

*“A healthy person  
has many wishes,  
but the sick person  
has only one.”*

— Indian Proverb —

My plan can save millions of lives and alleviate the suffering caused by preventable diseases. These efforts will help eliminate needless and expensive emergency room visits, hospitalization and intensive care stays. After four decades in healthcare, I have seen the good, the bad, and the ugly sides of medicine and health insurance around the world. Government-provided healthcare in most countries has failed to keep pace with the introduction of new technologies. A private healthcare system often becomes expensive and focused on caring for the rich and privileged.

As a young engineering student, I saw my father suffer and die from cancer and decided I wanted to work in oncology. After graduation I was fortunate to begin my career with an oncologist in Washington, DC in 1972. Five years later I opened Best Medical International and have operated the TeamBest family of companies ever since. I named my company Best to reflect my goal of being the best. I am proud to say that we have developed a reputation for being the best and most experienced in the business. Our products have saved millions of lives worldwide and continue to do so every day.

**Mahatma Gandhi dreamed of a free India. Today, it is the world’s largest democracy. I, too, have a dream – one shared by millions – and a plan to realize this dream of quality healthcare that is affordable and accessible to all, yet 30 percent lower in cost this decade. I believe everyone deserves the best healthcare. Only through education can we effectively eliminate poverty and promote global health, understanding, and peace.**

# Goals and Accomplishments

I established CURE Foundation in 2007 to create a new paradigm and promote my plan for improving healthcare globally. CURE Foundation's goal is to create private, truly non-profit, non-governmental, self-sustaining medical centers, express and mobile clinics around the world, for a global standard of care at a significantly lower cost than private for-profit centers.

## CURE Foundation will focus on establishing:

- ▶ Preventive Care Specialists
- ▶ Geriatric Care Specialists
- ▶ CURE U.S. and International Health Corps
- ▶ CURE Global Insurance
- ▶ CURE Global Purchasing Organization
- ▶ CURE Global Standard of Care
- ▶ CURE Institutes in the fields of neurological sciences; breast, prostate, lung, and gynecologic cancers; diabetes; obesity; cardiac care; drug & alcohol addiction; and other diseases

## CURE Foundation will, at a low cost or free of charge, address the need for:

- ▶ Purified drinking water for everyone
- ▶ Sewer systems where needed
- ▶ Dental hygiene and comprehensive dental care
- ▶ Vaccines to every child for immunizations
- ▶ HPV vaccines for teenage girls and young women
- ▶ Annual physical exams and diagnostic procedures
- ▶ Access to prescription drugs and major procedures including those for cancer, lung, heart, neurological, orthopedic, vascular and other diseases
- ▶ Optimal technology for the best clinical outcome
- ▶ Education and training for health care professionals

## In addition:

- ▶ Incentives and bonuses will be paid to health care professionals based on clinical outcomes and patient satisfaction
- ▶ Digital technology, electronic data systems, telemedicine, and use of the internet for other applications will be employed as much as possible

CURE Foundation has been working with medical centers, colleges of medicine, private and public hospitals and other organizations to fund cost-effective medical technologies. We are currently working with ambassadors, health ministers, presidents and prime ministers of many countries to develop a ten-year plan to upgrade healthcare programs.

CURE centers' commitment to **Proactive Healthcare™** (full transparency of benefits, clinical outcome, and cost) and the **Total Health™** system (prevention, early detection, effective treatment, and total cure) will open doors to a new era of affordable and accessible healthcare.

I would like to invite you and our fellow citizens of the world to join CURE Foundation's initiatives to reshape the future of our healthcare delivery so that poverty, malnutrition, and contagious diseases can be eliminated and lives improved by providing superior healthcare and education at a lower cost. **For more information, please visit [www.cure.lu](http://www.cure.lu).**

Sincerely yours,

*Krishnan Suthanthiran*
